Professional Experience

Google DeepMind **London, UK**
Senior Research Scientist *2026–*
Working on provenance (SynthID).

Prorok Lab at University of Cambridge **Cambridge, UK**
Research Associate *2024–2026*
Developed methods for remotely verifying which policy a robot is running, and what it is trying to do, from observations of its motion. Also worked on hybrid methods where neural networks help improve, rather than replace, algorithms with formal guarantees.

Technion **Haifa, Israel**
Postdoctoral Fellow *2023*
Studied how agent failures and adversarial conditions affect the robustness of distributed robotic systems. Developed swarm algorithms that complete their mission while adapting to crashes and other unexpected conditions.
